Customising iosta to meet your requirements

iosta

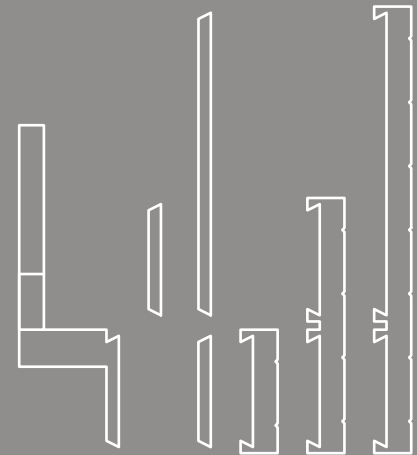

Message

Using the characters and pictograms shown, provide us with your message(s) to be machined onto product shell.

Finish

The product can be set in either anodized aluminium or with a lacquered finish in a wide range of colours to match your interior design.

iosta

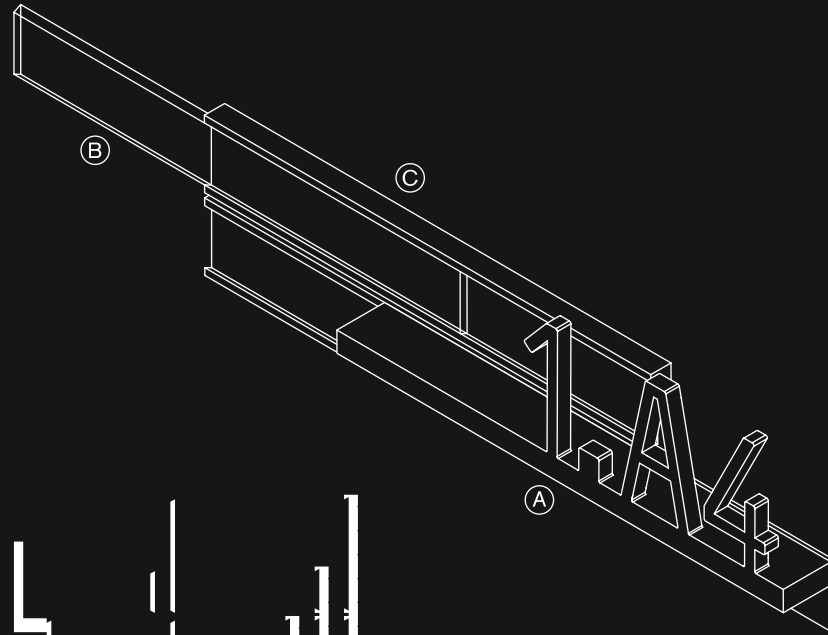

A Unique Solution

We understand the need that designers and architects have when it comes to specifying a product to suit the aesthetics of a physical space or brand.

We developed iosta to meet those needs. A unique and customisable wayfinding system that can be used in any environment and across any sector. Its modular system means it can be configured in any way depending on your signage needs, where its located and what it needs to communicate. Created to have timeless appeal, simple to maintain and completely customisable to represent your brand in terms of typography and colourway. Iosta, meaning minimal delivers customisation and simplicity in abundance.

Simplicity delivered in three key ways:

A. Customisable Shelving system provides a unique way of displaying your message, including a ready-made set of icons.

B. Acrylic window to hold customisable paper insert for ease of updating and maintenance.

C. To accommodate sign requirements, choose between three versions of backplate. A simple plate to hold custom shelf and two sizes that house paper inserts.

Length

Taking into account your custom message and paper insert information (if any) you can decide on length on product. Space can be left either side of message if necessary.
